Respected Sir,

I am Ishaan Chand, the Team Lead of our SIH 2026 team from SIT Pune.

Our team is preparing for Smart India Hackathon 2026: Software Edition, and we are aiming to build a research oriented and technically strong solution rather than treating SIH as only a hackathon project.

We are currently exploring SIH26139: Hybrid Quantum Machine Learning Platform for Early Disease Detection. Most of our team members is already working on research involving Quantum Machine Learning, chest X-ray analysis, lung segmentation and early Tuberculosis detection. We believe this existing research direction could potentially be developed further into a strong SIH solution while maintaining proper research validation and experimentation.

Our team has capabilities across AI/ML, QML, LLMs, cybersecurity, full-stack development, research and product presentation, and we intend to take the project from research and experimentation to a functional, demonstrable prototype.

We are prepared to put in the required effort and would be happy to meet you at your convenience to briefly present our team, proposed direction and initial research work. Hence, We would be grateful for an opportunity to work under your guidance for SIH 2026.

Requesting a Timely Response, as the Forms Soon Close.

Ishaan Chand,
SY AIML A3
Team Lead (Team Onix)

Dear Ishaan,

Please email a 1-page document outlining your technical approach for SIH26139, relevant past projects, and team role distribution so we can schedule a meeting post-review.
